

Gooseneck Electric Kettle

This electric kettle features a gooseneck spout for controlled pouring and a detachable base for cordless operation. It is equipped with an automatic shut-off function and a water level indicator.

Product Overview

Precision Brewing Performance

This stainless steel electric kettle is engineered for precision and efficiency, featuring a specialized gooseneck spout that allows for controlled, steady pouring. Designed for both home and office environments, it combines rapid boiling capabilities with essential safety features like automatic shut-off. Its cordless design and detachable base provide maximum convenience for daily use.
