

GPON/EPON Optical Network Unit

High-performance GPON/EPON optical network unit designed for fiber-to-the-home (FTTH) deployments. This compact and reliable device provides seamless connectivity for residential and small business users, supporting high-speed internet access, VoIP, and IPTV services.

Overview

High-Performance Fiber Connectivity

This GPON/EPON Optical Network Unit (ONU) is engineered for robust fiber-to-the-home (FTTH) deployments, ensuring reliable connectivity for both residential and small business environments. It supports high-speed internet, VoIP, and IPTV services through advanced Gigabit Ethernet ports. With built-in QoS capabilities and an intuitive web-based management interface, this device offers a seamless and efficient networking solution.

Technical Specifications

Connectivity

- Gigabit Ethernet Ports

Service Capabilities

High-Speed Internet • VoIP • IPTV

Supported Network Standards

GPON, EPON
