

GPS Module

This GPS module enables accurate location tracking. It is designed for reliable positioning data across various applications.

Overview

High-Precision GPS Module

This GPS module is designed to provide reliable and accurate positioning data for various transportation and fleet management applications. It offers seamless integration capabilities, ensuring consistent connectivity for real-time tracking and navigation needs. Built for durability and performance, this component supports efficient operational monitoring in diverse environments.

Technical Specifications

Module Type	GPS Positioning Module
Application Suitability	Fleet Management, Public Transport, Navigation, Real-time Tracking

Key Metrics

Performance Highlights

1 m Positioning Accuracy	99.9 % Signal Reliability
