

GPS Module

This GPS module provides accurate positioning data for various applications. It can be integrated into tracking devices and navigation systems.

Overview

Professional GPS Module for Fleet Management

This GPS module is engineered for integration into public transportation and fleet management systems. Designed to provide reliable tracking and location data, it supports efficient urban transit operations. Its compact form factor allows for seamless installation in various vehicle types, ensuring consistent performance in demanding environments.

Application

Primary Use Case	Public Transportation and Fleet Tracking
Compatible Vehicles	City Bus, Public Transit, Commercial Fleet

Technical Details

Device ID / Reference	188811
