

Grade 10.9 High Strength Hex Bolt

This high strength steel bolt is grade 10.9. It features a hexagonal head and fully threaded shank for demanding applications.

Product Overview

High-Strength Industrial Fasteners

These Grade 10.9 high-strength hex bolts are engineered for demanding industrial applications requiring superior tensile strength and durability. Compatible with a wide range of international standards including DIN, ISO, and ASTM, they are suitable for use in building, automotive, and machinery assembly. Available in multiple finishes and material compositions, these fasteners provide reliable performance in diverse environments.

Technical Specifications

Available Grades

8.8 • 10.9 • 12.9 • gr5 • gr8

Standards Compliance

- DIN 931/33/960/61/934/125/27/6914/15/16/7990
- ISO 4014/17
- ASTM A325/A490/A563/F436/A193 B7/A194 2H
- ANSI, ASME, BS, AS, JIS

Materials

Carbon Steel, Alloy Steel

Surface Finishes

Plain, Black Oxidized, Zinc Plated, Hot Dip Galvanized, Dacromet

Logistics & Supply

Monthly Supply Ability

800 tons

Supply Capacity

Standard Packaging

Item	Specification
Carton Weight	25kg
Pallet Configuration	36 cartons per pallet

Delivery Lead Time

7-30 days

Applications

Primary Applications

Building, Instrument Manufacturing, Automotive, Furniture
