

Grader Blade 1980 x 203 x 16 mm

This grader blade measures 1980*203*16 mm and is constructed from 30MnB material. It is a spare part suitable for use in motor graders.

Overview

High-Performance Grader Blade

This high-quality grader blade is engineered for demanding earth-moving applications, including road construction, land grading, and surface leveling. Constructed from durable 30MnB steel, it offers excellent wear resistance and structural integrity for motor grader equipment. The blade features a precision-engineered design with standardized mounting points to ensure a secure and reliable attachment for heavy-duty tasks.

Physical Dimensions

Length	1980 mm
Width	203 mm
Thickness	16 mm

Technical Details

Material Grade	30MnB
Bolt Configuration	14 x 5/8 inch

Application

Compatible Machinery	Motor Grader, Levellers, Earth Moving Machinery
