

Grain and Seed Gravity Grader Destoner

This gravity grader dry destoner is used for removing foreign objects from grain and oil crops. It is suitable for processing rice, wheat, peanut, soybean, rapeseed, sesame, mung bean, and sunflower seeds.

Product Overview

Grain and Seed Gravity Grader Destoner

This gravity grader and destoner is a versatile agricultural machine designed for the efficient separation of impurities from grains and seeds. It combines multiple working procedures into one compact unit, simplifying processing workflows while maintaining high output efficiency. Built for reliability, the machine features a compact structure that minimizes space requirements while ensuring ease of installation and maintenance.

Key Features

Core Advantages

- Multi-functional design combining multiple working procedures
- High foreign object removal efficiency
- High output capacity with low power consumption
- Compact structure for space-saving installation
- Convenient maintenance and setup

Technical Specifications

Technical Parameters

Model	Output (kg/h)	Power (kw)	Weight (kg)
GLSF63	4-5	0.18*2	280
GLSF80	5-6	0.25*2	340
GLSF100	6-8	0.25*2	420
