

Grain and Seed Pre-Cleaning Machine

This pre-cleaning machine efficiently removes impurities and foreign materials from grains and seeds. It utilizes a rotating screen system and high-capacity intake hopper to separate materials based on size and density.

Overview

Industrial Grain and Seed Pre-Cleaning Machine

This robust industrial pre-cleaning machine is designed for the efficient removal of impurities and foreign materials from a wide range of grains and seeds. Featuring an extended sieve design and double-sided support, it ensures stable and high-capacity processing even in demanding environments. The unit includes integrated dust extraction and adjustable settings, providing a professional solution for maximizing grain purity and operational uptime.

Performance Specifications

Model Specifications

Model	Capacity	Motor	Power	Air Volume	Dimensions
TSCY100	15-30t/h	XWD3-23	1.1kW	10-12m ³ /min	2240x1180x1920
TSCY125	15-35t/h	XWD3-23	1.5kW	10-14m ³ /min	2680x1520x2440
TSCY125A	25-45t/h	XWD5-59	3kW	10-14m ³ /min	3240x1615x2030
