Product Overview

High-Performance Grain Auger Gearbox

The GTM-S2070 gearbox is specifically engineered for grain augers and heavy-duty food and beverage machinery. Designed to provide reliable power transmission, this component ensures smooth and consistent material conveyance even in demanding industrial environments. Its robust construction and precision machining prioritize durability, minimizing maintenance requirements and maximizing operational uptime.

Technical Specifications

Key Performance Features

- Robust construction for demanding environments
- Efficient power transmission
- Precision machining
- Continuous-duty operation

Model Number

GTM-S2070

Application Sector

Grain Augers, Food & Beverage Machinery, Agricultural Equipment, Material Handling
