Product Overview

Industrial Grain Processing Solution

This high-capacity machine is designed for the efficient cleaning and drying of sesame seeds and wheat. It integrates a multi-stage process including feeding, desilting, ventilation, and moisture removal to ensure premium final output. Constructed with robust welded steel components, this unit provides the durability and hygiene standards required for modern food processing facilities.

Technical Specifications

Core Components

- Sesame water tank
- Drying chamber
- Rotating gear box
- Drainage device
- Impurity removal ventilation system

Process Features

Feeding, Cleaning, Desilting, Drying, Ventilation

Service and Support

Warranty and Repair Policy

The manufacturer covers defects related to the machine's original design within the guarantee period, providing replacement parts free of charge. Damage resulting from human factors is excluded from free replacement, though technical support remains available.

Warranty Period

One year limited warranty

Maintenance Coverage

Lifelong maintenance support provided
