

# Grain Cleaning Machine

This rice cleaning machine removes foreign objects from grain using screening. It separates materials like stones, sand, straw, and dust to ensure high-quality rice output.

## Overview

### High-Efficiency Grain Cleaning

This grain cleaning machine utilizes a vibration motor as its primary source of motion, ensuring stable operation and high reliability during processing. Designed with a compact structure, it offers low noise levels and energy-efficient performance. The system features excellent sealing to prevent dust overflow, maintaining a clean and safe operational environment.

## Performance Metrics

### Technical Specifications

Model	Output (kg/h)	Power (kW)
GLLZ80	10000	0.4*2
GLLZ100	15000	0.4*2

## Key Features

### Operational Benefits

- Stable operation via vibration motor
- High reliability
- Dust-free sealed design
- Compact footprint
- Low noise emissions
- Low power consumption
