

Grain Combine Harvester

This combine harvester is designed for efficient crop harvesting. It features a robust cutting mechanism, a large-capacity grain tank, and advanced control systems.

Product Overview

Super Combine CA-200

The CA-200 is a high-performance combine harvester engineered for maximum efficiency during large-scale crop harvesting. It features a robust cutting mechanism and a high-capacity grain tank, ensuring consistent performance across diverse field conditions. Designed for durability, this machine utilizes high-quality components to provide reliable service in demanding agricultural environments.

Key Features

Operational Capabilities

Efficient harvesting, Multi-grain compatible, High durability, Advanced control system
