

# Grain Destoner Machine

This grain destoner removes stones and heavy impurities from grains using screening and gravity separation. Its adjustable parameters and robust build allow use with various grain types.

## Product Overview

### TQLQ Series Grain Destoner

The TQLQ series grain destoner is designed for high-efficiency separation of stones and heavy impurities from grain streams. It utilizes specialized selecting chambers and advanced gravity separation to ensure optimal cleaning results. Engineered with a fully sealed structure and dual dedusting fans, this machine maintains a dust-free environment, making it a reliable solution for modern processing plants.

## Performance & Features

Noise Characteristics	Low noise operation
Vibration Technology	Reciprocating mechanism with rubber bearings for minimal vibration
Key Benefits	Dust-free, High cleaning efficiency, Low vibration, Easy operation

## Operational Details

Environmental Compliance	Yes
Dust Control System	Dual dedusting fans with fully sealed body
