

# Grain Destoner Machine

This precision machine removes stones and heavy impurities from grains. It utilizes a vibrating screen and aspiration system to ensure a clean and consistent grain output.

## Product Overview

### Precision Grain Cleaning Solution

The TQSX85B Grain Destoner is a professional-grade machine engineered for the efficient removal of stones and heavy impurities from grain streams, with specialized effectiveness for brown rice processing. It utilizes a unique sieve structure to optimize power consumption while maintaining high throughput. The unit is designed with a negative-pressure air suction system to ensure a cleaner working environment by preventing dust escape.

## Technical Features

### Key Functional Features

- Unique selection chamber for high-purity stone separation
- Specialized design optimized for brown rice processing
- Energy-saving sieve structure
- Negative-pressure dust containment system

### Application Compatibility

Grain Processing, Brown Rice, Stone Removal
