Product Overview

Professional Grain Threshing Solution

This versatile thresher is engineered for high-efficiency grain separation, supporting crops such as rice, wheat, barley, and sorghum. Featuring an integrated chaff and dust suction system, it ensures clean processing with minimal grain loss. The machine's robust design and portability make it an ideal choice for both field and farm-based post-harvest operations.

Technical Specifications

Productivity

500 kg/h

Grain Processing Speed

Model Specifications

Parameter	Details
Model Designation	5TG-80
Engine Compatibility	170-type Gasoline Engine
Drum Speed	860 r/min
Overall Weight	73 KG
Supporting Power	1.65 KW

Key Features

System Functions

- Chaff suction
- Dust suction
- Cleaning system
- Dry and wet crop processing

Compatible Crops

Rice, Wheat, Barley, Sorghum
