

Granite and Marble Cutting Blade with U-Slot

This dry laser cutting blade is designed for cutting granite and marble. It features a narrow U-slot design for efficient cutting speed and high efficiency.

Overview

High-Efficiency Stone Cutting Solution

This professional-grade dry laser cutting blade is specifically engineered for precision work on granite and marble. Featuring a narrow U-slot design, it optimizes debris removal and cooling to maintain high cutting speeds and overall efficiency. The laser-welded construction ensures a durable bond between segments and the steel core, making it an ideal choice for demanding construction and stone fabrication applications.

Technical Design

Design Features

- Narrow U-slot segments
- Laser-welded segment bonding
- High-quality steel core
- Dry cutting capability

Functional Benefits

Feature	Benefit
Narrow U-Slot	Enhanced cooling and efficient debris removal
Laser Welding	Strong, durable bond for long-lasting performance
Dry Laser Sheet	Clean and precise cuts without water requirements

Applications

Target Industries

Stone Fabrication • Construction • Masonry

Compatible Materials

Granite, Marble, Natural Stone
