

Granite Block Diamond Wire Saw

Diamond wire saws are used for granite block squaring, dissevering, and shaping. These saws come in models with varying specifications to suit different granite hardness levels.

Product Overview

High-Performance Granite Diamond Wire Saws

These diamond wire saws are engineered specifically for the squaring, dissevering, and shaping of granite blocks. Designed to handle various hardness levels, these tools feature high-quality plastic fixing methods for durability and reliability. With customizable bead configurations and optimized line speeds, they provide efficient cutting performance across hard, mid-hard, and soft granite types.

Technical Specifications

Available Bead Diameters	10.5mm, 11.0mm
Beads per Meter	37 beads/m, 40 beads/m
Fixing Method	High-quality plastic

Performance Metrics

Performance by Granite Hardness

Granite Type	Line Speed (m/s)	Cutting Speed (m ³ /h)	Wire Life (m ³ /m)
Hard Granite	20-24	25-40	7-10
Mid-hard Granite	22-26	40-70	8-15
Soft Granite	24-28	60-90	12-20

Customization

Customization Policy	Other specifications are available upon requirement.
