

Granite Cutting Diamond Tool

Diamond tools designed for cutting granite and similar materials. These tools feature a segmented rim with diamond-impregnated cutting edges for efficient and precise cutting.

Product Overview

Professional Granite Cutting Tools

These high-performance diamond tools are engineered specifically for the precision cutting of granite and similar hard stone materials. Featuring a specialized segmented rim with diamond-impregnated edges, they ensure efficient material removal and clean cuts. Designed for professional use, these tools are available in various sizes and color-coded configurations to help operators quickly identify the correct tool for specific granite applications.

Technical Specifications

Design Features

- Segmented rim design
- Diamond-impregnated cutting edge
- Color-coded for material identification

Performance Highlights

1 High

Cutting Efficiency

1 High

Precision Level

Primary Applications

Granite, Hard Stone, Masonry Cutting
