

Granular Fertilizer Spreader for Agriculture

This fertilizer spreader is designed for even distribution of granular fertilizers, seeds, and lawn care products. Its adjustable flow control ensures precise application, while the sturdy frame and pneumatic tires allow for smooth operation.

Product Overview

Professional Granular Fertilizer Spreader

This robust granular fertilizer spreader is designed for efficient and uniform distribution of seeds, fertilizers, and ice melt products. With a 30kg capacity, it is an ideal tool for both agricultural farming and commercial gardening maintenance. Its durable construction and easy-to-set gate adjustments ensure precise application rates across various terrains.

Technical Specifications

Weight Capacity	30 kg
Volume Capacity	20 L
Body Dimensions (L x W x H)	815 x 685 x 815 mm

Application & Usage

Compatible Materials	Fertilizer, Seeds, Salt, Ice Melt
----------------------	-----------------------------------

Logistics

Package Configuration	1 piece per carton
40' HQ Container Load	940 pcs
