

Granular Material Rotary Cleaning Machine

This high-performance rotary cleaning machine efficiently separates and cleans granular materials. It features adjustable settings, a robust frame, and a high-capacity hopper for continuous operation.

Product Overview

High-Performance Granular Cleaning

This rotary cleaning machine is engineered for the efficient separation and cleaning of various granular materials. It features a robust, durable frame and a high-capacity hopper designed to support continuous industrial operation. With adjustable settings and a built-in self-cleaning mechanism, this equipment ensures consistent results while minimizing maintenance downtime.

Operational Details

Core Features

- Adjustable speed settings
- Multiple screen size configurations
- Self-cleaning mechanism
- High-capacity input hopper

Target Sectors

Agricultural, Food Processing, Industrial
