

# Granule Combination Weighing and Packing Machine

This combination weigher packing machine is designed for efficiently weighing and packing granular materials, including nuts, rice, and candy. It features a touchscreen display, PLC control, and temperature control for stable operation and precise sealing.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Granule Packing Solution

This combination weighing and packing machine is engineered for the precise and efficient packaging of granular materials, including nuts, rice, and candies. It integrates advanced control systems, including a PLC for stable operation and intelligent temperature controllers for consistent sealing quality. Designed for user-friendly operation, the system features a clear touchscreen interface that displays real-time working status and operational indicators.

## Technical Specifications

Model Number	RF-520
Power Supply	220V/50Hz (380V/50Hz)
Roll Film Width	520 mm
Sealing Type	Back seal
Packaging Film Thickness	0.04-0.09 mm

## Performance Metrics

### Packing Speed

**5 Bags/min**  
Minimum Speed

**50 Bags/min**  
Maximum Speed

## Bag Dimensions

### Bag Size Range

Dimension	Range
Length	60-400 mm
Width	150-250 mm

## Features

### Control System Components

- PLC Control System
- Intelligent Temperature Controller
- Touchscreen Interface

### Available Sealing Patterns

Cross-striped, Straight, Twill, Mesh
