

Grapple Fork Attachment for Skid Steers and Tractors

This grapple fork attachment is designed for efficient material handling in construction and agricultural applications. The grapple arms provide a secure grip on various materials, including logs, brush, and debris.

Overview

Versatile Material Handling

This heavy-duty grapple fork attachment is engineered for efficient material handling in both construction and agricultural environments. Designed for compatibility with skid steers and tractors, it features robust steel construction and powerful jaw plates to securely grab and transport logs, brush, and debris. Its durable design ensures long-lasting performance and increased productivity on any job site.

Technical Specifications

型号 Model	FCS21260	FCS21272	FCS21284
重量 Operating weight(Kg)			
工作宽度 BSweep width (mm)	1524	1828	2134
总长 Length(mm)	915	915	915
总宽 Width(mm)	1524	1828	2134
闭合高度 Closing height(mm)	502	502	502
张开高度 Open height(mm)	864	864	864

Dimensional specifications for available grapple fork models.
