

Gravity-Fed Water Filter Dispenser

This gravity-fed dispenser filters water using a two-chamber system. The unit is made of clear plastic for easy monitoring of water levels.

Product Overview

Clean Water On Demand

This gravity-fed water filter dispenser is designed for convenient household use, providing an efficient way to access filtered water. Featuring a clear, transparent construction, users can easily monitor water levels at a glance. Its dual-chamber design facilitates gravity-fed filtration, ensuring a steady supply of treated water for everyday consumption.

Technical Specifications

Rated Flow Rate

1.2 L/H

Flow Rate

Model Number

QY98-1

Product Category

Gravity-Fed, Water Purifier, Household Appliance

Compliance and Safety

Hygiene Compliance

This product is manufactured in accordance with strict hygiene standards for appliances involving drinking water safety. It is designed to meet regulatory requirements for safe water handling and dispensing.

Design Features

Physical Design

- Transparent reservoir for water level monitoring
- Two-chamber gravity-fed system
- Integrated dispensing mechanism
- Durable housing construction
