

Gravity-Fed Water Purifier

This gravity-fed water purifier features a two-chamber design for unfiltered and purified water. It uses a filter element to remove impurities, providing clean drinking water for homes and offices.

Product Overview

Gravity-Fed Filtration Solution

This gravity-fed water purifier offers a reliable solution for converting civic tap water into clean drinking water. Designed with a user-friendly two-chamber system, it utilizes an active carbon filtration process to effectively remove impurities. Its compact and transparent design allows for easy monitoring of water levels, making it suitable for various home and office environments.
