

Gravity Feed Spray Gun

This spray gun is designed for applying a variety of coatings with precision and efficiency. Featuring a gravity-feed design, it optimizes material usage and reduces waste.

Product Overview

Professional Performance Gravity Feed Spray Gun

The H-2000 gravity-feed spray gun is engineered for precision, efficiency, and consistent finish quality across a wide range of surfaces. Its ergonomic design is built for comfort during extended professional use, while the adjustable nozzle allows users to customize spray patterns to specific project requirements. By leveraging a gravity-feed mechanism, this tool optimizes material usage and significantly reduces waste, making it an ideal choice for both demanding professional environments and high-quality DIY projects.

Technical Specifications

Feed Type	Gravity Feed
Model ID	H-2000

Key Features

Key Features

- Optimized material usage to reduce waste
- Adjustable nozzle for customizable spray patterns
- Ergonomic handle for extended use
- Durable construction for demanding environments

Ideal Applications	Professional Painting, Coating Applications, DIY Projects
