

Gravity Feed Spray Gun

This spray gun is designed for a variety of coating applications. It features a gravity-feed cup for efficient material usage and adjustable spray patterns for precise control.

Product Overview

Professional Performance Gravity Feed Spray Gun

This high-performance gravity-feed spray gun is engineered for versatility and precision across automotive, industrial, and woodworking applications. Designed with an efficient gravity-feed system to maximize material usage, it provides consistent atomization for smooth, professional-grade finishes. The tool features adjustable spray patterns, offering operators granular control for various project requirements and durable construction for long-term reliability in demanding environments.

Key Features

Suitable Applications

Automotive, Industrial, Woodworking

Technical Details

Control Features

- Adjustable spray patterns
- Precise flow control
- Efficient material cup design

Performance Highlights

1 Smooth

Finish Quality

1 Consistent

Atomization

Feed Type

Gravity Feed
