

Gravity Feed Spray Gun

This spray gun is designed for a variety of coating applications. It features adjustable spray patterns and efficient material atomization, ideal for automotive, industrial, and woodworking.

Overview

Professional Performance Spray Gun

This high-performance gravity feed spray gun is engineered for precision and efficiency across diverse professional coating applications. Designed for reliability, it provides consistent material atomization that ensures high-quality finishes for automotive, industrial, and woodworking projects. The balanced design and integrated gravity-feed cup facilitate smooth operation and superior material control for complex surfaces.

Technical Specifications

Compatible Materials

- Paints
- Lacquers
- General Coatings

Target Applications

Automotive, Industrial, Woodworking

Feed Type

Gravity Feed

Features

Equipment Highlights

- Adjustable spray pattern
- High-efficiency atomization
- Durable construction
- Consistent gravity-feed delivery
