Product Overview

Heavy-Duty Gray Iron Brake Drum

This high-performance brake drum is engineered from Gray Iron 250, specifically designed for heavy-duty truck and construction machinery applications. It features precision-machined surfaces to ensure consistent contact with brake linings, optimal heat dissipation, and reliable stopping power. Built to meet stringent quality standards, this component offers excellent wear resistance and durability for demanding operational environments.

Technical Specifications

Dimensions

Dimension Type	Value
Hole Dividing Round	335
Inner Diameter	419
Outer Diameter	448
Material	Gray Iron 250
Weight	55.68 kg

Manufacturing & Quality

Monthly Production Capacity

30000 pcs/month
Pieces

Manufacturing Processes

- Automatic casting production line
- Lost foam casting
- Tokyu molding
- Auto hydrostatic pressure testing
- CNC machining center

Certifications

ISO, TS

Logistics

Delivery Ports

- Shanghai
- Wuhan

Packaging

Wood pallet or as per customer requirements
