

Grease Lubrication Pump

This high-pressure grease pump is designed for efficient lubrication in industrial and automotive applications. It dispenses grease in machinery, vehicles, and equipment.

Product Overview

Professional Lubrication Solutions

These high-pressure grease and oil pumps are engineered for efficient lubrication across diverse industrial and automotive environments. Designed for durability and ease of use, the units feature robust construction, ergonomic handles, and flexible hoses to ensure seamless access to critical lubrication points. Available in multiple capacities and styles, these pumps provide reliable performance for machinery and vehicle maintenance.

Technical Specifications

Available Models

Model Code	Capacity	Style/Type
SX1052	20L	Grease Pump
SX1028-2	16L	Italy-Style Grease Pump
SX1028-3	16L	German-Style Grease Pump
SX1029-4	16L	Oil Pump
SX1028-1	16L	Oil Pump

Features

Key Features

- High-pressure output for effective lubrication
- Ergonomic handle design for operator comfort
- Flexible hose attachments for hard-to-reach points
- Mobile options equipped with wheels
- Robust construction for industrial durability

Suitable Applications

Industrial Machinery, Automotive Maintenance, Vehicle Lubrication, Equipment Servicing
