Product Overview

Reliable Visual Signaling

This LED indicator light is engineered for precise status monitoring in electric power transmission and distribution systems. Featuring a vibrant green signal, it offers clear visual feedback for control and signal applications. The unit is designed for easy panel mounting and includes a durable housing with ventilation for reliable long-term operation.

Technical Specifications

Current Consumption

20 mA

Max Current

Model Number	AD22-22DS
Operating Voltage	220 V
Indicator Color	Green

Compliance and Standards

Certifications

CE

Compliance Standards

- IEC60947-5-1
- EN60947-1
