

Green Metal Shovel Head for Gardening

This is a green metal shovel head designed for gardening and digging tasks. The shovel head features a robust, pointed blade for efficient soil penetration and a tubular socket for handle attachment.

Product Overview

Professional Gardening Shovel Head

This durable green metal shovel head is engineered for heavy-duty gardening, digging, and soil preparation tasks. Its robust design features a sharp, pointed blade that allows for efficient soil penetration, even in compact environments. The integrated tubular socket ensures a secure attachment for a handle, providing a reliable tool for professional landscaping and intensive agricultural use.

Technical Specifications

Finish and Coating
