Product Overview

Professional Urinal Flushing Control

The SB7-CA35 green push button is a robust, single-flush control interface designed for reliable operation in commercial restroom environments. Engineered with high-grade anti-flam plastics and a zinc alloy body, it offers excellent durability and resistance to electrical erosion. This versatile component is compatible with standard flush systems and adheres to international safety standards, ensuring long-term performance and optimal water conservation.

Technical Specifications

Rated Insulation Voltage	AC 600V (50Hz/60Hz)
Conventional Heating Current	10 A
Contact Resistance	d25 ^h ©
Insulation Resistance	e5 ^M ©
Power Frequency Withstand Voltage	AC 2.5KV/min

Performance Metrics

Mechanical Life

1000000 cycles

Push Button Operations

Electrical Life

5000000 cycles

Push Button Cycles

Certifications & Compliance

Compliance Standards

- GB/T14048.1
- IEC60947-5-1

Certifications

CE, ISO9001, ROHS, UL

Application Compatibility

Common Industrial Applications

Distribution Boxes • Distribution Cabinets • Control Cabinets • Power Stations • Communication Networks
