

Grid Solar Panel Set

This set contains solar panels of varying sizes. The panels are designed with a grid of photovoltaic cells for efficient energy conversion.

Overview

High-Efficiency Solar Power Solution

This Grid Solar Panel Set provides a versatile and efficient energy conversion solution suitable for a wide range of applications, from residential rooftops to commercial installations. Featuring a durable silver-framed design, these panels are engineered for optimal photovoltaic performance. The set includes three differently sized units to accommodate various spatial and energy requirements.

Technical Specifications

Panel Configuration

- 3-piece set
- Variable panel sizes
- Grid-style photovoltaic cell layout

Build Quality

Silver-framed, Photovoltaic, Grid-pattern
