

Grind and Brew Coffee Maker

This appliance combines a coffee grinder and coffee maker into one unit, allowing for fresh coffee to be brewed directly from whole beans. It features a stainless steel and black finish and a carafe for collecting the brewed coffee.

Product Overview

Compact Grind and Brew Solution

This versatile coffee maker combines a built-in grinder with a brewing system, allowing you to prepare fresh coffee directly from whole beans or pre-ground powder. Its unique, compact design is perfect for space-conscious environments without sacrificing functionality. With an easy-start system and intuitive controls, it offers a seamless brewing experience for professional or home use.
