

# Grinder Pump for Wastewater

This grinder pump features a high chrome impeller and cutter for effective use in celtic and irrigation systems. It is capable of cutting and pumping out suspended solids such as gloves, wood, and cloth.

## ADDITIONAL IMAGES

## Product Overview

### Heavy-Duty Grinder Pump

This robust grinder pump is engineered for demanding wastewater applications, including residential, commercial, and industrial sewage systems. It features a high-torque motor and a hardened cutting mechanism designed to effectively reduce solids, preventing clogging in small diameter pipelines. Built for submersible installation, this pump ensures reliable, long-term operation in harsh effluent environments.

## Construction Materials

Impeller and Cutter Material	High chrome, heat treated
Pump Body and Motor Frame	Cast iron
Mechanical Seal	SiC/SiC
Shaft Material	SS304

## Technical Features

### Installation

Submersible

### Operational Capabilities

- Automatic operation capable
- Float switch compatible
- Hardened cutting mechanism
- High-torque motor

### Suitable Applications

Sewage, Effluent, Waste fluids, Residential, Commercial, Industrial
