

Grinding Abrasive Material

This high-performance abrasive material is designed for grinding applications. The product's hardness and durability ensure efficient material removal and a long service life, making it suitable for various electric tools and accessories.

Product Overview

High-Performance Grinding Abrasive

This high-performance abrasive material is specifically engineered for demanding grinding applications where precision and durability are paramount. Its exceptional hardness ensures efficient material removal and an extended service life, making it a reliable choice for professional use. Designed with an optimal grain size and distribution, it provides consistent performance, uniform wear, and minimal surface damage across a variety of substrates.

Application & Usage

Primary Functions

- Shaping
- Sharpening
- Finishing

Compatible Materials

Metal, Stone, Hard Materials

Performance Features

Key Benefits

High Hardness • Extended Durability • Uniform Wear • Efficient Material Removal
