

Grinding Disc 100mm for Steel and Cast Iron

This grinding disc is designed for use on stainless steel, general steel, and cast iron. It has a 100mm diameter and 6.0mm thickness.

Product Overview

High-Performance Grinding Disc

This grinding disc features a depressed center flange specifically engineered for use with hand-held angle grinders. It utilizes resin bonds to provide cool grinding characteristics, ensuring consistent quality and a superior finish on metal surfaces. Designed for versatility and durability, this disc delivers above-average performance across a wide range of materials, including stainless steel, general steel, and cast iron.

Technical Specifications

Dimensions

100 mm
Diameter

6 mm
Thickness

16 mm
Bore Size

Performance Metrics

15300 rpm
Max Speed

80 m/s
Max Operating Speed

Material Compatibility

Stainless Steel, General Steel, Cast Iron

Usage Guidelines

Specification Code

27 A 24R-BF

Recommended Operating Angle

15-30 degrees to flat surfaces
