

# Grinding Wheel for Angle Grinders

This grinding wheel is designed for use with angle grinders. It is suitable for grinding metal surfaces, providing efficient material removal and a smooth finish.

## Overview

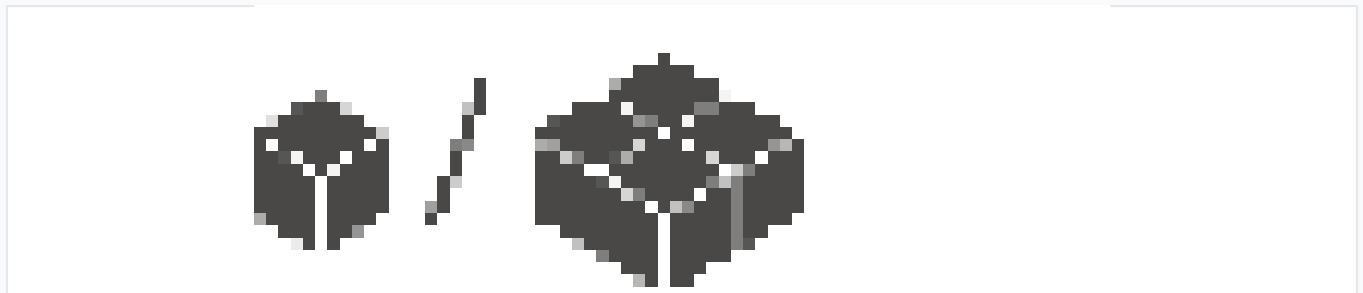

Engineered for efficient material removal and a smooth finish on metal surfaces.

## High-Performance Metal Grinding Discs

These professional-grade grinding wheels are engineered for efficient material removal on various metal surfaces. Designed for use with standard angle grinders, they offer a smooth and consistent finish while maintaining a long service life. Manufactured to EN12413 standards, these discs ensure reliable performance in demanding industrial and workshop environments.

## Technical Performance

Durable construction ensures extended tool life and consistent performance.

### Operating Limits

**80 m/s**  
Max Peripheral Speed

**Standard Compliance**  
EN12413 • A24R BF-T27

**Primary Application** Metal Grinding

## Product Range

### Available Dimensions & Speed Ratings

Product Code	Diameter (D1) mm	Bore (D2) mm	Thickness (T) mm	Max RPM (min⁻¹)
CADG-MG6022115	115	22.23	6	13300
CADG-MG6422115	115	22.23	6.4	13300
CADG-MG6022125	125	22.23	6	12250
CADG-MG6422125	125	22.23	6.4	12250
CADG-MG6022150	150	22.23	6	10200
CADG-MG6022180	180	22.23	6	8500
CADG-MG6422180	180	22.23	6.4	8500
CADG-MG6022230	230	22.23	6	6650
CADG-MG6422230	230	22.23	6.4	6650

## Logistics & Packaging

Packing Quantity (Inner/Middle/Outer)	5 / 25 / 50-100 pcs
