

Grooved Pipe Coupling

Designed for joining pipes with grooved ends, this coupling provides a secure and leak-tight connection. It is constructed from durable materials such as ductile iron with a corrosion-resistant coating.

Product Overview

Professional Grooved Pipe Coupling

This rigid grooved pipe coupling is engineered for secure, leak-tight connections in demanding industrial environments, including fire protection systems, plumbing, and HVAC applications. Constructed from high-strength ductile iron with a corrosion-resistant coating, it ensures long-term durability and reliability. The design features a pressure-responsive gasket system, facilitating quick installation and efficient maintenance for various pipe diameters.

Technical Standards

Compliance Standards	ASTM, BS Standard
Material Standards	ASTM A536, BS2798

Dimensions & Sizing

Available Sizes	1 inch to 12 inches
-----------------	---------------------

Key Features

Primary Applications

Fire Protection • Plumbing • HVAC • Industrial Piping

Design Advantages

- Pressure-responsive gasket for enhanced sealing
- Corrosion-resistant coating
- Durable ductile iron construction
- Easy installation and maintenance
