Product Overview

Permanent Anchorage Solution

This permanent anchorage system is designed specifically for securing car shelters on challenging surfaces like asphalt or paving stones. By utilizing high-strength steel components, the kit ensures maximum stability for your shelter even in extreme wind conditions. The package includes all necessary hardware and installation instructions for a secure, long-lasting setup.

Technical Specifications

Included Components

- Black steel stakes with pointed ends
- Eye bolts for cable/rope attachment
- Installation screws
- Washers and O-rings
- Installation instructions

Construction Material	High-strength steel with corrosion-resistant coating
Compatible Surfaces	Asphalt, Paving Stones
