

Ground Source Heat Pump Unit

This ground source heat pump unit is designed for efficient heating and cooling. It features a robust metal enclosure and a replaceable air filter for easy integration into HVAC systems.

Overview

Industrial Ground Source Heat Pump

This industrial-grade ground source heat pump unit is engineered for highly efficient heating and cooling in commercial and industrial environments. Featuring a robust metal enclosure and a compact, integration-friendly design, it ensures reliable temperature control while maintaining ease of maintenance. The unit is built for durability and long-term cost-effectiveness, making it an ideal solution for demanding HVAC requirements.

Physical Characteristics

Enclosure Material	Robust Metal
Design Highlights	Compact Design, Industrial Grade, Easy Integration

Maintenance

Maintenance Components

- Replaceable air filter
- Service-friendly layout

Performance

Ideal Applications

Commercial • Industrial • HVAC Integration
