Product Overview

Professional Grout Cleaning Sponge

This high-density PU material sponge is specifically engineered for professional tiling projects. Its fully rounded corners are designed to prevent grout splash and spillage, ensuring a cleaner workspace. With superior water-holding capacity, it effectively smooths grout lines and removes residue from ceramic, porcelain, and natural stone surfaces.

Technical Specifications

Material	Polyurethane (PU)
Design Features	Rounded Corners, High Density, Absorbent

Performance

Performance Highlights

100 %

Water Holding Capacity

Applications & Usage

Primary Applications

- Smoothing grout between tiles
- Removing grout residue
- General tile surface cleaning

Compatibility

Compatible Tile Types

Ceramic • Porcelain • Natural Stone
