Product Overview

Professional Grout Scrubbing Solution

This high-density polyurethane (PU) scrubbing sponge is engineered specifically for the demanding needs of tile installation and maintenance. Designed to effectively remove excess grout, haze, and residue, its durable porous structure ensures maximum water absorption and scrubbing power. It provides a reliable, scratch-free finish suitable for both professional contractors and DIY enthusiasts.

Technical Specifications

Material Composition	Polyurethane (PU)
Primary Application	Epoxy Removal, Grout Cleaning, Tile Surface Scrubbing

Performance Features

Key Benefits

- High water absorption capacity
- Durable high-density foam construction
- Non-abrasive surface protection
- Effective residue removal

Performance Highlights

100 %
Scrubbing Efficiency
