

GSM/W-CDMA Single Band Mobile Signal Booster Kit

This single-band mobile booster kit enhances cellular signal strength for either GSM 900MHz or 3G W-CDMA 2100MHz networks. The amplifier boosts the signal received from the external antenna and rebroadcasts it through the indoor antenna, improving call quality and data speeds in areas with weak signal coverage.

Product Overview

Boost Your Cellular Connectivity

This single-band mobile booster kit is designed to significantly improve cellular signal strength for either GSM 900MHz or 3G W-CDMA 2100MHz networks. By amplifying weak signals received from an external antenna and rebroadcasting them indoors, the system ensures reliable voice quality and stable data transmission. It is an ideal solution for homes, small offices, and vehicles experiencing poor network coverage.

Technical Specifications

Included Components

- Repeater/Amplifier unit
- External antenna
- Indoor antenna
- Coaxial cables with connectors
- Power adapter

Suitable Environments

Homes • Small Offices • Vehicles • Small Businesses

Supported Frequency Bands

GSM 900MHz, 3G W-CDMA 2100MHz

Performance Metrics

Key Performance Features

1 Single

Band Configuration
