Product Overview

Engine Performance Enhancement

The GT2052V turbocharger is engineered to significantly enhance engine power and efficiency for compatible Ford vehicles. By compressing intake air, this unit allows for increased fuel combustion, resulting in improved throttle response and overall vehicle output. Designed with a variable nozzle turbine (VNT) mechanism and an integrated electronic actuator, it ensures precise control and optimal airflow across various engine speeds.

Technical Specifications

Part Number	752610-5035S
Engine Compatibility	Transit 2.4LTR
Material	K18
Warranty	1 year

Application

Compatible Vehicles	Ford Transit, Landrover Defender
---------------------	----------------------------------

Key Features

Key Features

- Variable Nozzle Turbine (VNT) design
- Integrated electronic actuator
- Optimized for performance and efficiency
- Direct replacement design
