Product Overview

High-Performance Turbocharging

The GT2256S turbocharger is precision-engineered to maximize engine efficiency and power output. Designed for complex V8 engine systems, this unit optimizes intake air pressure to significantly improve torque and throttle response. Its robust construction ensures long-term reliability under the demanding operating conditions typical of high-displacement luxury vehicles.

Technical Specifications

Compatible Engine Models	N63B44, N63
Displacement	4.4 L
Cylinder Configuration	V8 Cylinders, 32 Valve

Cross-Reference

Vehicle Application

Compatible Vehicle Models

Vehicle Series	Model Variant
5 Series	550i GT (F07), 550i (F10/F11)
6 Series	650i (F12/F13)
7 Series	750i (F01/F02/F03/F04)
X5 Series	xDrive50i (E70/E71/E72)
