Product Overview

High-Performance GTX35 Turbocharger

The GTX35 Automotive Turbocharger is engineered for enthusiasts seeking enhanced engine power, torque, and responsiveness. Featuring a precision-engineered compressor and turbine wheel, this unit is designed to optimize airflow and boost pressure for high-performance applications. Its robust construction ensures long-lasting reliability, making it an ideal upgrade for vehicles requiring increased horsepower and improved throttle response.

Technical Specifications

Part Numbers

Type	Reference Number
Internal Part Number	G3500012
OE Part Number	803715-1

Model	GTX3582
-------	---------

Application & Usage

Application	High Performance, Automotive Upgrade
Installation	Professional installation recommended.
