## Overview

### Advanced Guard Patrol Monitoring

The WM-5000L4D is a professional-grade guard tour reader designed to enhance security management through real-time communication and automated monitoring. Featuring a high-visibility OLED screen and integrated voice call functionality, it allows for seamless coordination between security personnel and management. This rugged device is built to withstand demanding environments while providing critical safety features like panic alarms and impact detection.

## Communication & Alerts

Real-time voice communication allows guards to coordinate quickly during emergencies with 5 preset numbers.

### Voice Call Capabilities

- Preset up to 5 groups of phone numbers
- Real-time emergency communication
- Two-way voice coordination
- Voice-prompted task hints at checkpoints

## Safety & Security

Comprehensive safety suite including Mandown detection, Panic alarms, and impact sensing.

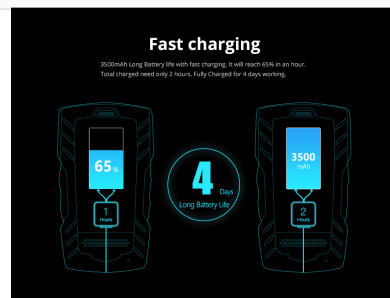

### Safety Monitoring Functions

Panic Alarm, Impact Detect, Mandown Alarm, Pedometer, Alarm Clock

## Technical Performance

IP67 rated housing ensures reliable operation in rainy conditions and dusty environments.

High-capacity 3500mAh battery supports up to 4 days of operation with fast-charging capabilities.

### Protection Level

IP67 Waterproof • Dustproof • Shock Resistant

### Battery & Charging
