Overview

Portable guard tour system featuring an integrated flashlight for nighttime patrols.

Professional Guard Tour Solution

This electronic guard tour system is a practical and robust tool designed to monitor and manage security personnel, surveillance teams, and maintenance staff. It ensures strict adherence to established patrol routes and schedules, providing reliable accountability and operational efficiency. With its integrated flashlight, durable construction, and advanced tracking capabilities, it is an essential asset for maintaining safety and security in challenging environments.

Key Features

Equipped with voice and light prompts for clear feedback during patrol rounds.

Core Features

Integrated Flashlight • IP67 Waterproof • Shockproof Design • Auto Induction Reading • Voice & Light Prompts • Touch Button Operation

Operating Environment

Parameter	Value
Operating Temperature	-40°C to +85°C
Humidity	10% to 90% (non-condensing)
Ingress Protection	IP67

Physical Characteristics

Design

WM-5000V45 has fundamentally improved silicon tank metal body with rubber shell outside IP 67 is the strongest, most durable used in many guard tour system

Robust design featuring a metal body and protective rubber shell for industrial durability.

Dimensions & Weight

- Dimensions: 148mm x 47mm x 30mm
- Weight: 243g
- Construction: Metal body with rubber shell

Power & Connectivity

Complete system package including the handheld reader, communication cable, and user manual.

Power & Connectivity

- Battery: 3.7V Rechargeable, 1150mAh
- Communication: Pogo pin connection cable
