Overview

Comprehensive Guard Tour Management

This electronic guard tour system is designed to provide effective oversight for security and surveillance personnel. It ensures staff follow established patrol routes and adhere to set schedules, enhancing operational accountability. Equipped with modern tracking features like impact recording and pedometers, it provides a robust solution for managing patrol activities in demanding environments.

Features

Multi-functional device featuring integrated flashlight, impact records, and pedometer.

Key Functionalities

Impact Recording, Pedometer, Flashlight, Alarm Clock, USB Connectivity

Durability

Engineered for harsh environments with waterproof and shock-resistant design.

Rugged Construction

Waterproof • Shatter-resistant • Dustproof
